

ENERLOGIC® FILM TAKES ITS PLACE
ALONGSIDE OTHER TOP HOME ENERGY-SAVING MEASURES.

SAVE ENERGY
IN EVERY SEASON & CLIMATE

It's quickly and cleanly applied to the inside surfaces of your home's windows by one of our premier Vista™ window film dealers. No construction mess. No major disruptions. And once the film is applied, it's as easy to clean as your windows are today.

Backed by a lifetime manufacturer's warranty,⁽⁵⁾ EnerLogic® film can help you save energy all year long.

(5) Certain restrictions apply; see an authorized dealer for warranty details.

To learn more, visit www.enerlogicfilm.com or call **(800) 345-6088**.

Or contact your local Vista™ window film dealer today to arrange for a free Energy Audit.

Now your existing windows can give you greater comfort and greater energy savings no matter where you live.

VISTA®
WINDOW FILM

ENERLOGIC® WINDOW FILM MAKES YOUR HOME MORE COMFORTABLE. (AND LOWERS YOUR ENERGY BILLS, TOO.)

ADD AN INSULATING LAYER
THAT DRAMATICALLY REDUCES
THE WARMTH LOST
THROUGH YOUR WINDOWS.

In cold weather, even multi-pane windows allow warmth to escape from your home. EnerLogic® window film helps keep radiant heat inside your home to increase comfort and decrease wasted energy. It's the only window film of its type that has demonstrated heating savings in cold-weather climates – up to 10% on single-pane windows!

A less expensive, more convenient alternative to replacement windows.

Until now, the best way to upgrade your windows for all-season performance has been to replace them with better windows. But EnerLogic® film is about one-third the cost of replacement windows, and far less disruptive to your home.

Single pane windows + EnerLogic® window film = Dual pane windows

EnerLogic® film upgrades the annual insulating performance of single-pane windows to that of double-pane windows, and makes double-pane windows perform like triple-pane⁽¹⁾! It's the perfect balance of energy efficiency, comfort, and cost-savings—all year long.

(1) Product VEP35 SR CDF.

3x more total cooling and heating savings of other comparable films.⁽²⁾

3x
energy savings

EnerLogic®

Your windows account for about one-third of your annual heating and cooling costs. EnerLogic® film helps keep solar heat out of your house in hot weather, and helps keep radiant heat inside during cold weather. This can produce energy savings totaling as much as \$3,500 over the life of the film!

Other window films

(2) High light-transmission, non-low-e films across a variety of climates and window types.

LETS SUNLIGHT IN
BUT KEEPS SOLAR HEAT OUT
TO HELP REDUCE YOUR COOLING BILLS.

In hot climates, standard windows allow solar heat into your home, which drives up your cooling costs. EnerLogic® film adds a subtle but effective barrier on your existing windows, letting natural sunlight in... but filtering out excess heat, glare, and UV radiation. This produces up to a 33% savings boost on cooling costs over conventional films⁽⁴⁾.

(4) Compared to other high light-transmission, non-low-e films.

Energy savings equivalent to replacing 35 (60-watt) light bulbs.

The year-round energy savings from adding EnerLogic® film⁽³⁾ to an average home is equivalent to replacing all the light bulbs in your home with energy-efficient CFLs.

(3) Product VEP 70 SR CDF.
